PROFESSIONAL SUMMARY

MCA student with a strong Computer Science foundation and hands-on experience in AI-driven web development. Proficient in Java, Python, Deep Learning, IoT, and modern web technologies, with a proven ability to design, build, and deploy AI, web, and IoT-based solutions. Skilled at translating complex technical requirements into functional, user-focused applications. Seeking a Software Development, AI/ML, or Full Stack Developer role to apply strong problem-solving and engineering skills in a fast-paced, growth-oriented environment.

RELEVANT COURSEWORK

- | | | |
|----------------------------------|-------------------------|----------------------|
| • Data Structures and Algorithms | • Software Engineering | • Deep Learning |
| • Object Oriented Programming | • Computer Graphics | • Internet of Things |
| • Database Management Systems | • Computer Organization | • Data Science |
| • Operating Systems | • Web Technologies | • Big Data Analytics |
| • Computer Networks | • Machine Learning | |

EXPERIENCE

AI Web Development Virtual Internship, InAmigos Foundation

June 2026 - July 2026

- Developed AI-assisted, responsive web pages using HTML, CSS, and JavaScript, ensuring consistent usability across devices.
- Built and optimized modern websites, improving UI/UX design and overall website performance.
- Leveraged AI tools to accelerate development and content generation, and supported website testing and deployment.

PROJECTS

Deep Learning Model for Brain Tumor Classification

- Designed and trained a CNN model to classify brain tumors from MRI images with high accuracy.
- Applied hyperparameter tuning to optimize model performance and reduce overfitting.
- Achieved improved classification performance over baseline models through iterative training and evaluation.

Smart Silent Zone Monitoring System in IoT

- Developed an IoT-based system to monitor real-time noise levels in designated silent zones.
- Integrated sound sensors with embedded systems for continuous, real-time sound detection.
- Designed an automatic alert-generation mechanism to flag noise violations instantly.
- Deployed sensor hardware for reliable field-level noise monitoring.

Secure Encryptor aNd Decryptor (SEND)

- Built a secure web application enabling encryption and decryption of files and text.
- Implemented AES, DES, and Triple DES encryption algorithms to ensure robust data security.
- Developed a responsive, user-friendly interface for seamless encryption and decryption operations.
- Applied core cryptography principles to safeguard sensitive user data.

Java Brick Breaker Game | Java, Applet

- Developed a desktop-based Brick Breaker game applying object-oriented programming principles.
- Implemented collision detection logic for accurate real-time gameplay mechanics.
- Designed an interactive graphical user interface using Java Applet.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Web Technologies: HTML, CSS, JavaScript, PHP

Databases: MySQL, MongoDB

EDUCATION

Master of Computer Applications (MCA)

2025 - 2027

The Gandhigram Rural Institute (DTBU) | CGPA: 8.63

Bachelor of Science in Computer Science

2022 - 2025

The Gandhigram Rural Institute (DTBU) | CGPA: 8.22

CERTIFICATIONS & ACHIEVEMENTS

- Responsive Web Design - freeCodeCamp
- JavaScript Algorithms and Data Structures - freeCodeCamp
- First Prize - Debugging Competition - IntraFace, The Gandhigram Rural Institute (DTBU)
- Third Prize - Designing Competition - IntraFace, The Gandhigram Rural Institute (DTBU)
- Third Prize - Technical Interview Competition - IntraFace, The Gandhigram Rural Institute (DTBU)
- Third Prize - State Level Debugging Competition - NPR College
